## LEGEND

### Titanium

Titanium is an environmentally friendly, natural metal that is 40% stronger and 30% lighter than stainless steel. It is hypoallergenic because it is nickel-free. Perfect for water sport enthusiasts, it is extremely resistant to salt water and other forms of corrosion and able to withstand extreme temperatures. Most Seiko titanium watches are further enhanced with a glass coating for increased scratch resistance.

### BLACK ION FINISH

The Black ion finish is applied to the cases and bracelets of select watches. The Physical Vapor Deposition (PVD) process creates lustrous satin and/or polished finishes in shades of black, gray and blue.

### LumiBrite

LumiBrite watches are environmentally safe and will glow brightly for hours without pushing a button or drawing energy from a battery.

Water-resistant to 30 meters (100 feet). Withstands splashes of water or rain but should not be worn while swimming or diving.

Water-resistant to 50 meters (165 feet). Suitable for showering or swimming in shallow water.

Water-resistant to 100 meters (330 feet). Suitable for swimming and snorkeling.

Water-resistant to 200 meters (660 feet). Suitable for skin diving.

Diver's to 200 meters (660 feet). Meets ISO standards and is suitable for scuba diving.

## SOLAR CHRONOGRAPH

Powered by light energy • Hour, minute, and small second hands • Chronograph measures up to 60 minutes in 1/5-second increments with split time measurement function • When the measurement reaches 60 minutes, the stopwatch automatically stops counting • 24-hour indicator • Date calendar • 6-month power reserve once fully charged • LumiBrite hands and markers • Screwdown caseback • Caliber V175

# SEIKO KINETIC

**In the Seiko Nation, your body's  
motion generates the power**

## 2016 KINETIC COLLECTION

The electricity generated by the movement of your body is stored in a rechargeable battery. Unlike all other types of battery, this rechargeable battery will provide the power your watch needs for an extended period, with no need for periodic battery exchange. It's better for the environment and more convenient for you.

## KINETIC GMT

Powered by movement • Environmentally friendly • The most advanced watch technology • Power reserve indicator function  
GMT indicator • 6-month power reserve • Date calendar • LumiBrite hands and markers • Screwdown see-through caseback • Caliber 5M85

# SEIKO TECHNOLOGY

## GPS SOLAR

Accurate time, anywhere on earth. Seiko has created a watch that automatically receives time, time zone, and day and date data from the global network of GPS satellites. It recognizes all time zones on earth.

## SPRING DRIVE

World's most accurate watch powered by a main spring.  
Seiko has replaced the traditional escapement with a Tri Synchro Regulator for unequaled accuracy and power reserve.

## KINETIC DIRECT DRIVE

Kinetic Direct Drive Caliber 5D44 encompasses the best of both worlds: quartz accuracy with the emotional engagement of a mechanical and is environmentally friendly. This exclusive technology draws energy from the movement of your wrist or the turn of the crown and keeps you informed with a power reserve indicator.

## KINETIC CHRONOGRAPH

The next generation of high-performance timekeeping and a Seiko world's first.  
All the features of stopwatch timing plus Kinetic technology.

## KINETIC PERPETUAL

Another world's first technology from Seiko. Kinetic Perpetual combines the features and benefits of the industry's leading watch technology – Kinetic Auto Relay and Perpetual Calendar. Once set, the calendar automatically adjusts for odd and even months including February of leap years up to February 2100. When the watch senses 24 hours of inactivity it puts itself into suspended animation (sleep mode) to conserve energy. The date continues to advance correctly while the watch is asleep. Wake it up with a few shakes of your wrist and it automatically resets itself to the correct time even if it's been asleep for up to 4 years.

## SEIKO KINETIC

Seiko Kinetic is the first and only quartz watch powered by human energy. Based on revolutionary technology, Seiko Kinetic watches run entirely on self-generated energy from the natural movement of your wrist. Environmentally friendly.  
The most advanced electronic watch technology. Six-month power reserve.

## SEIKO SOLAR

Seiko Solar watches collect energy from any light source and convert it into electrical energy. This energy is stored in a rechargeable lithium ion cell which takes the place of a conventional watch battery. From there, the watch operates like any other quartz watch.

## ALARM CHRONOGRAPH

Seiko alarm chronographs offer the features of a chronograph along with a 12-hour alarm.

## CHRONOGRAPH

Seiko chronographs provide standard watch functions as well as precise stopwatch timing for a variety of activities.

## PERPETUAL CALENDAR

The Seiko Perpetual Calendar automatically adjusts for odd and even months including February of leap years.

# FLIGHT COMPUTER

SEIKO FLIGHT COMPUTER WATCHES ARE FITTED WITH A ROTARY SLIDE RULE BEZEL FOR RAPID CALCULATIONS AND CONVERSIONS OF FLIGHT DATA AS REQUIRED BY PILOTS. THE ROTARY SLIDE RULE CONSISTS OF A BEZEL RULER AND A DIAL RULER, BOTH OF WHICH PROVIDE A WIDE VARIETY OF COMPUTATIONS AND CONVERSIONS OUTLINED BELOW.

## CONVERSION SCALES

DISTANCE: Nautical Miles ↔ Statute Miles ↔ Kilometers

FUEL VOLUME CONVERSION:

US gallons ↔ Imperial gallons ↔ Liters

WEIGHT CONVERSION: Pounds ↔ Kilograms

FUEL VOLUME-TO-WEIGHT CONVERSION:

Fuel pounds ↔ US gallons ↔ Imperial gallons

Oil pounds ↔ US gallons ↔ Imperial gallons

## COMPUTATION FOR NAVIGATION

Time calculation:

computes time to fly based on ground speed and distance to fly

Speed calculation:

computes ground speed based on distance to fly and time to fly

Distance calculation:

computes distance to fly based on ground speed and time to fly

Calculation of fuel consumption rate:

(per hour) based on time to fly and fuel consumption

Calculation of fuel quantity required:

based on time to fly and fuel consumption rate

Calculation of time remaining for cruising:

based on fuel innage and fuel consumption rate

Calculation of climbing altitude:

based on climbing rate and climbing time

Calculation of climbing rate:

based on climbing time and target altitude

Calculation of climbing time:

based on climbing rate and target altitude

## KINETIC

## Seiko Series SUN (5M85)

## Features

- Automatic power generator.
- Power reserve indicator function.
- Energy depletion forewarning function.
- Overcharge prevention function.
- Duration of full charge is approximately 6-months
- Hour, minute and second hands.
- 24 hour hand
  - › Capable of indicating Greenwich Mean Time (GMT) or used as dual time indicator.

## How to Charge the Watch

When using the watch for the first time after it is purchased, be sure to charge the power reserve sufficiently by swinging the watch side to side before setting the time and other functions.

1. Swing the watch from side to side approximately 250 times at the rate of twice per second. This will start the watch and the second hand will move at one-second intervals. Swinging the watch 200 times further will reserve approximately one additional day of power.
2. Set the time/calendar and put on the watch.

## Note:

Wearing the watch continuously for 12 hours will accumulate power to run the watch for approximately one and a half additional days.

As a general guideline, if you wear the watch every day for 12 hours over a period of a week, the power to run the watch for approximately ten days will be additionally secured. If the watch enters the power save mode, this amount of energy will keep the watch from running for approximately one month and a half.

## How to set time and Date

- Unscrew (if screwdown type) the crown by turning it counter-clockwise and pull out to the first click position.
- Turn the crown clockwise until the previous day's date appears.
- Pull the crown out to the second click.
- Turn the crown to advance the hands until the date changes to the next day. The time is set for the A.M. period. Keep advancing the hands to set the correct time.
- Push the crown back into the original position.
- Screw in crown (if screwdown type).

## How to Use the 24-Hour Hand

Because this watch is designed with an hour hand that can move separately from the other hands, setting procedures are a bit different.

You can set the watch in two different modes:

- The 24-hour hand shows 24-hour time and acts as an AM/PM indicator while the hour hand shows 12-hour time

OR

- The 24-hour hand shows the time in a different time zone from the time shown by the hour hand.
  1. Pull the crown out to the second click position when the second hand is at the 12 o'clock position.
  - 2a. For a single time zone, so the 24-hour hand indicates AM/PM, turn the crown in either direction to set the minute hand and 24-hour hand to the current time in your area, using the 24-hour marks on the dial.

OR

- 2b. To use the 24-hour hand to indicate time in another zone, turn the crown in either direction to set the minute hand and the 24-hour hand to the time in another area, using the 24-hour marks on the dial.
3. Push the crown back to normal position.
4. Now pull the crown out to the first click position and rotate it in either direction, moving the hour hand around the dial (it moves in one hour increments) until both the date and hour are correct for your area.
5. Push the crown back to normal position.

## Checking the Power Reserve

The power reserve indicator function shows how much energy is stored. To check how long the watch can operate on its current charge, wait until the second hand is in the 12 o'clock position and press the button at the 2 o'clock position on the watch case. Then use the chart below to determine how much stored energy is indicated by the number of seconds that the second hand moved. The second hand will resume normal operation in 30 seconds or less.

★ QUICK MOVEMENT OF SECOND HAND	5 seconds	10 seconds	20 seconds	30 seconds
POWER RESERVE	More than 1 day	More than 7 days	More than approximately 1 month	Approximately 6 months

## KINETIC/KINETIC RETROGRADE DAY INDICATOR

Seiko Series SKA (5M62, 5M82),  
SRN (5M84), SMY (5M83)

### Features

- Automatic power generator.
- Power reserve indicator function.
- Energy depletion forewarning function.
- Overcharge prevention function.
- Duration of full charge is approximately 6-months
- Hour, minute and second hands.
- 24-hour hand (5M65 only)
  - › Capable of indicating Greenwich Mean Time (GMT) or used as dual time indicator.

### How to Charge the Watch

When using the watch for the first time after it is purchased, be sure to charge the power reserve sufficiently by swinging the watch side to side before setting the time and other functions.

1. Swing the watch from side to side approximately 250 times at the rate of twice per second. This will start the watch and the second hand will move at one-second intervals. Swinging the watch 200 times further will reserve approximately one additional day of power.
2. Set the time/calendar and put on the watch.

Note:

Wearing the watch continuously for 12 hours will accumulate power to run the watch for approximately one and a half additional days.

As a general guideline, if you wear the watch every day for 12 hours over a period of a week, the power to run the watch for approximately ten days will be additionally secured. If the watch enters the power save mode, this amount of energy will keep the watch from running for approximately one month and a half.

### How to set time and Date

- Unscrew (if screwdown type) the crown by turning it counter-clockwise and pull out to the first click position.
- Turn the crown clockwise until the previous day's date appears.
- Pull the crown out to the second click.
- Turn the crown to advance the hands until the date changes to the next day. The time is set for the A.M. period. Keep advancing the hands to set the correct time.
- Push the crown back into the original position.
- Screw in crown (if screwdown type).

### How to Use the 24-Hour Hand (5M65)

Because this watch is designed with an hour hand that can move separately from the other hands, setting procedures are a bit different.

You can set the watch in two different modes:

- The 24-hour hand shows 24-hour time and acts as an AM/PM indicator while the hour hand shows 12-hour time

OR

- The 24-hour hand shows the time in a different time zone from the time shown by the hour hand.
  1. Pull the crown out to the second click position when the second hand is at the 12 o'clock position.
  - 2a. For a single time zone, so the 24-hour hand indicates AM/PM, turn the crown in either direction to set the minute hand and 24-hour hand to the current time in your area, using the 24-hour marks on the dial.

OR

- 2b. To use the 24-hour hand to indicate time in another zone, turn the crown in either direction to set the minute hand and the 24-hour hand to the time in another area, using the 24-hour marks on the dial.
3. Push the crown back to normal position.
4. Now pull the crown out to the first click position and rotate it in either direction, moving the hour hand around the dial (it moves in one hour increments) until both the date and hour are correct for your area.
5. Push the crown back to normal position.

### Checking the Power Reserve

The power reserve indicator function shows how much energy is stored. To check how long the watch can operate on its current charge, wait until the second hand is in the 12 o'clock position and press the button at the 2 o'clock position on the watch case. Then use the chart below to determine how much stored energy is indicated by the number of seconds that the second hand moved. The second hand will resume normal operation in 30 seconds or less.

QUICK MOVEMENT OF SECOND HAND	5 seconds	10 seconds	20 seconds	30 seconds
POWER RESERVE	Between 1 and 7 days	Between 7 days and 1 month	Up to 1 month	Up to 6 months

## KINETIC PERPETUAL

## Seiko Series SNP (7D48, 7D56)

## Features

- Automatic power generator
- Automatic energy saving function
- Time Relay function
- Perpetual Calendar (to the year 2100)
- Energy depletion forewarning function
- Overcharge prevention function
- Duration of full charge is approximately 4 years

## Kinetic Auto Relay

- This watch is equipped with an Automatic Power Generator, the unique technology developed by Seiko, which generates electrical energy to power the watch by utilizing the movement of the arm or wrist, and stores it in the rechargeable lithium ion cell.

## Power Save Function

- In order to conserve the stored electrical energy, the watch automatically enters power save mode to stop the hands from moving approximately 24 hours after the watch is taken off the wrist.
- In a case that the fully charged watch enters the power save mode, the time relay function of the watch remains operable for approximately four years.

## Time Relay Function

- When the watch is in power save mode, swinging the watch several times will activate the "time relay function," which automatically resets the watch hands to the correct time that has been retained inside the watch.

## Perpetual Calendar Function

- Once set, the calendar automatically adjusts for odd and even months including February of leap years until the year 2100.
- While the watch is in power save mode, the perpetual calendar continues to function (the calendar continues to properly advance).
- Even if the watch is completely stopped due to a shortage of stored electrical energy, the calendar can be manually adjusted by simple procedures.

## How to Charge the Watch

When using the watch for the first time after it is purchased, be sure to charge the power reserve sufficiently by swinging the watch from side to side before setting the time and other functions.

1. Swing the watch from side to side approximately 500 times at the rate of twice per second. This will start the watch and the second hand will move at one-second intervals. Swinging the watch 200 times further will reserve approximately one day of power.
2. Set the time/calendar and put on the watch.

Note: Wearing the watch continuously for 12 hours will accumulate power to run the watch for approximately one and a half additional days.

## DISPLAY AND BUTTON OPERATION

❖ Orientation of the displays of year, month and 24-hour indicator may vary depending on the model.

As a general guideline, if you wear the watch every day for 12 hours over a period of a week, the power to run the watch for approximately ten days will be additionally secured. If the watch enters the power save mode, this amount of energy will keep the watch running for approximately one month and a half.

## How to Set Time and Date

Because the calendar is pre-adjusted at the factory, you may only need to set the time and date.

## Time Adjustment

1. Pull out the crown to the second click. The second hand will stop on the spot.
  - › If your watch has a screw lock type crown, unscrew the crown first, and then pull it out to the second click.
  - › To set the second hand exactly, pull out the crown to the second click at the moment the second hand is pointing to the 12 o'clock ("0" second) position.
2. Turn the crown to set the time.
  - › Remember to check the 24-hour indicator to correctly set AM/PM.
  - › To set the time accurately, advance the minute hand 4 to 5 minutes ahead of the correct time, and then turn it back to the exact time.
3. Push the crown back into the original position. The watch immediately starts ticking.
  - › To set the second hand exactly, push the crown back into the original position in accordance with a time signal.

## Date Adjustment

- Pull crown out to first click.
- Rotate crown either way to adjust to the correct date.
- Push crown back to normal position.

## Complete Calendar Adjustment

- Complete calendar adjustment will only be necessary if the watch is completely stopped due to shortage of stored energy.

## KINETIC PERPETUAL

### Seiko Series SNP (7D48, 7D56)

(cont'd)

- Each calendar item should be adjusted in sequence of Year, Month and then Date.
- Pull crown out to first click.
- Rotate crown to advance date and month until the correct year is displayed. Refer to the Leap Year chart to determine if the current year is a leap year or to determine if it is 1, 2 or 3 years past the last leap year.
- After setting the watch to the correct year, continue to rotate the crown to set the correct month and then the correct date.
- Pull crown out to second position to set to the correct time. (see Time Adjustment)
- Push crown back to original position.

Note: The date, month and year indicators work independently from the hands of the watch. Advancing the hands will not advance the date, month or year.

Year Indication	L.Y.	+1	+2	+3
Number of years passed since the last leap year	Leap Year	One Year	Two Years	Three Years
Year	2004	2005	2006	2007
	2008	2009	2010	2011
	2012	2013	2014	2015
	.	.	.	.
	.	.	.	.

	.	.	.	.
	2088	2089	2090	2091
	2092	2093	2094	2095
	2096	2097	2098	2099

## KINETIC DIRECT DRIVE Seiko Series SRG (5D22)

### Features

- Automatic power generator
- Kinetic electricity storage unit
- Power reserve indicator
- Real-time power indicator

### How to Charge and Start the Watch

- Turn the crown clockwise repeatedly to charge the watch
- After electric power generation by turning the crown continues for a certain period, the direct drive indicator hand moves to point at scale marking 0 and the second hand starts moving. Make sure to stop turning the crown to check it.
- Continue to turn the crown to sufficiently charge the watch.

### How to Read the Direct Drive Indicator

- The direct drive indicator can be used to check power reserve amount (continuous operating time) and real-time power generation status and newly generated amount of power while charging watch.
- In a case that the fully charged watch enters the power save mode, the time relay function of the watch remains operable for approximately four years.

### How to Read the Direct Drive Indicator While Charging the Watch

- Turn the crown clockwise. After approximately one second, the direct drive indicator hand starts moving.
- Continue to turn the crown. The indicator hand moves upward and downward according to the power generation status.
- Stop turning the crown. The direct drive indicator hand returns to display the total amount of power reserve after approximately 4 seconds.

#### <Display and movement flow of the direct drive indicator hand while charging the watch>

✦ The position of the date window may differ depending on the model.

### How to Set the Time and Calendar

- Pull out the crown to the second click when the second hand is at the 12 o'clock position.
- Turn the crown to set the time.
- Push the crown back in to the normal position.

### How to Set the Date

- Pull out the crown to the first click
- Turn the crown counterclockwise until the current date appears.
- Push the crown back in to the normal position.

## AUTOMATIC

### Seiko Series SRP (4R35,4R36), SSA (4R38,4R39)

#### Features

- Hand wind and automatic wind
- Overwind protection function
- Power reserve indicator

#### How to Wind the Main Spring

This watch is an automatic watch equipped with a manual winding mechanism.

- When the watch is worn on the wrist, the motion of the wearer's arm winds the mainspring of the watch.
- If your watch is completely stopped, it is recommended that you manually wind the mainspring by turning the crown clockwise.

#### How to Set Time and Date (4R35)

- Pull out the crown to the first click. (The second hand continues moving and the accuracy of the watch is unimpaired).
- Turn the crown counterclockwise until the date hand points to the previous day's date.
  - › Example: if today is the 6th of the month, the date display should indicate the previous date, the 5th.
- Pull the crown out to the second click when the second hand is at the 12 o'clock position. (The second hand stops on the spot). Turn the crown to advance the hour and minute hands until the date changes to indicate the current date. The time is now set for the a.m. period. Advance the hands to set the correct time taking a.m. and p.m. into consideration.
- Push the crown back into the original position.

#### Note:

- The mechanism of mechanical watches is different from that of quartz watches. When setting the time, be sure to turn back the minute hand a little behind the desired time and then advance it to the exact time.
- Do not set the date between 9:00 p.m. and 1:00 a.m. If you do, the date may not change properly and it may cause a malfunction.

#### NAMES OF THE PARTS

##### ● 4R35

##### ● 4R37

##### CROWN

- a) Normal position : winding up the mainspring (manual operation)
- b) First click position : date setting
- c) Second click position : time setting

#### How to Set Time Day and Date (4R36)

- Pull out the crown to the first click. (The second hand continues moving and the accuracy of the watch is unimpaired).
- Turn the crown clockwise to set the day.
- To set the date, turn the crown counterclockwise until the previous days date appears.
- Pull the crown out to the second click when the second hand is at the 12 o'clock position. (The second hand stops on the spot). Turn the crown to advance the hour and minute hands until the date changes to indicate the current date. The time is now set for the a.m. period. Advance the hands to set the correct time taking a.m. and p.m. into consideration.
- Push the crown back into the original position.

#### How to Set Time Day and Date (4R38, 4R39)

- Pull out the crown to the first click when the second hand is at the 12 o'clock position. (The second hand stops on the spot.)
- Turn the crown to set the hour and minute hands to the correct time.
- Push the crown back into the original position.

- Cal. 4R39 has a 24-hour hand, which moves correspondingly with the hour hand. When setting the time, check that the 24-hour hand is correctly set.

10:08

22:08

## AUTOMATIC Seiko Series SKX (7S26)

### Features

- Automatic winding capabilities
- Hour, minute and second hands
- Day/Date calendar
- 200 meter water resistance
- One way rotating elapsed time bezel

### Precautions on Using the Watch for Diving

Before diving make sure that the watch operates normally and be sure to observe the precautions described below.

- Do not use the watch for saturation diving using helium gas.
- Check that:
  - › The crown is locked tightly in place.
  - › There are no visible cracks in the crystal or the watch band.
  - › The strap or bracelet is securely fastened to the watch case.
  - › The buckle keeps the strap or bracelet firmly secured to the wrist.
  - › The rotating bezel turns counterclockwise smoothly (the rotation must not be too loose or too tight) and the "▼" mark aligns with the minute hand.
  - › The time and calendar are appropriately set.
  - › The second hand is operating normally (if not, swing the watch for more than 30 seconds wind the mainspring sufficiently).

### While Diving

- Do not operate the crown when the watch is wet or in the water
- Take care not to hit the watch against hard objects such as rocks.
- Bezel rotation may become slightly stiffer underwater. This is not a malfunction

### How to Wind the Main Spring

This watch is an automatic watch equipped with a manual winding mechanism.

- When the watch is worn on the wrist, the motion of the wearer's arm winds the mainspring of the watch.
- If your watch is completely stopped, it is recommended that you swing the watch from side to side in a horizontal arc for approximately 30 seconds.

### How to Set the Calendar/Time

- Unlock the crown by turning it counterclockwise.
- Pull the crown out to the first click when the second hand is at the 12 o'clock position. (The second hand stops on the spot).
- Turn the crown clockwise until the previous day's date appears.
- Turn the crown counterclockwise until the previous day of the week in the desired language appears.
- Pull the crown out to the second click.
- Turn the crown to advance the hands until the date and day change to the next. When they have changed, the time is set for the A.M. period. Keep advancing until the desired time is reached.
- Push and lock the crown by turning it clockwise while pressing it.

### Note:

- Do not change the day or the date between 9:00 p.m. and 4:00 a.m.

### How to Set Rotating Bezel

- The rotating bezel can show up to 60 minutes of elapsed time.
- For safety's sake, the rotating bezel rotates only counterclockwise, so that the time measured is never shorter than the actual elapsed time.
  - › Please refer to the below diagram:

**1** Turn the rotating bezel to align the "▼" mark to the minute hand.

**2** When time has elapsed, read the number on the rotating bezel.

**Example:** Starting time : 10:10  
Finishing time : 10:40  
Elapsed time : 30 minutes

## PERPETUAL CHRONOGRAPH (Caliber V198)

### Features

- No battery change required
- Lasts for 6 months after full charge
- Power reserve indicator
- Energy depletion forewarning function
- Overcharging prevention function

### How to Set the Perpetual Calendar (Day, Date, Month, and Leap Year)

- Pull the crown out to the second click.
- A - Press once. The day hand turns a full circle.
- B - Press to set the day of the week.
- A - Press once. The calendar hand turns a full circle.
- B - Press to set the date.
- A - Press again. The day hand indicates "M" and the calendar moves forward and points to the month.
- B - Press to set the month.
- A - Press again. The day hand indicates "L" and the calendar hand moves forward and points to the number of years since the last leap year.
- B - Press to set the number of years since last leap year.
  - 2015 = 3 (3 years since leap year)
  - 2016 = 00 (2016 is a leap year)
  - 2017 = 1 (1 year since leap year)
  - 2018 = 2 (2 years since leap year)
  - 2019 = 3 (3 years since leap year)
- Push crown in to normal position

### How to Adjust the Time

- Pull the crown out to the second click when the small second hand is at the 12 o'clock position.
- Turn the crown to set the main dial time.
- B - Press to set the alarm sub-dial time to the current time in 24 hour format.
- Push crown in to normal position.

### How to Set an Alarm

#### Push Button "B" to enter Calendar/Alarm mode. Each press of "B" alternates between Calendar/Alarm mode and Stopwatch mode)

- Pull the crown out to the first click while in Calendar/Alarm mode. The day hand will point to "AL"
- A or B - Press the A button to advance the time on the subdial by 1 minute. Press the B button to move it back by one minute.
- Push the crown in to normal position
- The alarm sounds for 20 seconds at the designated time.
- A or B - Press to silence the alarm.

### How to Use the Stopwatch

#### Push Button "B" to enter Stopwatch mode. Each press of "B" alternates between Calendar/Alarm mode and Stopwatch mode)

##### Standard Measurement:

- Press button "A" to start or stop.
- Press button "B" to reset.

##### Accumulated Elapsed Time Measurement:

- Press button "A" to start, stop and restart.
- Press button "B" to reset.

##### Split Time Measurement:

- Press button "A" to start.
- Press button "B" to measure split time and then again to release split time.
- Press button "A" to stop. To reset press button "B".

##### Measurement of Two Competitors:

- Press button "A" to start.
- Press button "B" for finish time of first competitor.
- Press button "A" for 2nd competitor finish.
- Press button "B" for finish time of 2nd competitor.
- Press button "B" to reset.

## ALARM CHRONOGRAPH SEIKO SERIES SNA (CALIBER 7T62 QUARTZ), SSC (CALIBER V172, SOLAR QUARTZ)

### Features

- Alarm can be set on a 12-hour basis with two small hands
- Alarm hands can indicate the time in a different time zone
- Chronograph can measure up to 60 minutes in  $\frac{1}{5}$  seconds. After 60 minutes, it will start counting again from "0" repeatedly up to 12 hours (7T62)
- Chronograph can measure up to 60 minutes (V172)

### How to Set Time and Calendar

- Pull out the crown to the first click. (The second hand continues moving and the accuracy of the watch is unimpaired).
- Turn the crown clockwise until the previous day's date appears
  - › Example: if today is the 6th of the month, the date display should indicate the previous date (the 5th).
- Pull the crown out to the second click when the second hand is at the 12 o'clock position. (The second hand stops on the spot). Turn the crown to advance the hour and minute hands until the date changes to indicate the current date. The time is now set for the a.m. period. Advance the hands to set the correct time taking a.m. and p.m. into consideration.
- Push the crown back into the original position.

### How to Use Alarm Demonstration Button (V172 Only)

- Pull out crown to first click position.
- Press button "A" three to four seconds (when holding button "A" the alarm sound will ring).

### How to Set the Main Dial Time and the Alarm Sub-Dial Time

- Pull out crown to the second click position.
- Turn crown to set the desired time in the 12 hour format regardless of whether it is AM or PM.
- Press button B to set the alarm sub-dial time to the current 24 hour.
- Push crown back to normal position.

### How to Set the Alarm

Pull out crown to the first click position while in Calendar/ALARM mode.

- Press button B to advance the hands in the 24 hour alarm sub-dial to the desired alarm time.
  - › Each press of button B will advance the alarm time by one minute.
  - › Hands will move quickly if button B is kept pressed.
- Push crown back to normal position.

### Standard Measurement

Press button "A" to start or stop.

Press button "B" to reset.

### Accumulated Elapsed Time Measurement

Press button "A" to start, stop and restart.

Press button "B" to reset.

### Split Time Measurement

Press button "A" to start.

Press button "B" to measure split time and then again to release split time.

Press button "A" to stop. To reset press button "B".

### Measurement of Two Competitors

Press button "A" to start.

Press button "B" for finish time of first competitor.

Press button "A" for 2nd competitor start.

Press button "B" for finish time of 2nd competitor.

Press button "B" to reset.

**CHRONOGRAPH****Seiko Series SND (7T92)****SOLAR CHRONOGRAPH****Seiko Series SSC (V175, V176)****Features**

- Multi-display analog chronograph measures split and elapsed time
- Chronograph measures  $\frac{1}{20}$  seconds up to 12 hours (7T92) (V175)
- Chronograph measures  $\frac{1}{5}$  seconds up to 12 hours (V175)
- Date calendar

**How to Set Time and Calendar**

1. Pull out the crown to the second click position.  
Turn crown to set the hour and minute hands.
2. Push the crown into the first click position.
  - a) Turn clockwise until desired date appears.
  - b) Push crown back into normal position.

**How to Use Chronograph**

With the crown in second click position, press "A" for two seconds.

- a) Chronograph hands will reset to "0" position – ready to use.
- b) If chronograph hands do not reset to "0" position, press "A" to select  $\frac{1}{2}$  second hand, then press "B" repeatedly to adjust.
- c) Repeat for second and hour hand.

**Standard Measurement**

Press button "A" to start or stop.

To reset, press button.

**Accumulated Elapsed Time Measurement**

Press button "A" to start, stop and restart.

To reset, press button "B".

**Split Time Measurement**

Press button "A" to start.

Press button "B" to measure split time and then again to release split time.

To stop, press button "A". To reset, press button "B".

**Measurement of Two Competitors**

Press button "A" to start.

Press button "B" for finish time of first competitor.

Press button "A" for 2nd competitor start.

Press button "B" for finish time of 2nd competitor.

Press button "B" to reset.

## CHRONOGRAPH (CALIBER 7T94)

### Features

- Multi-display analog chronograph measures split and accumulated elapsed time.
- Chronograph measures up to 60 minutes in  $\frac{1}{5}$ -second increments.
- Date calendar.

### How to Set Time

1. Unscrew the crown (if screwdown type) and pull out to the second click position.
2. Turn the crown clockwise to advance hour and minute hands to the desired time.
3. Push the crown back into the original position. The watch immediately starts ticking.
4. Screw in crown (if screwdown type).

### How to Set Chronograph Hand Position

1. With the crown in the second click position, press button "A" for 2 seconds.
  - a) Chronograph minute hand turns a full circle.
2. Press button "B" repeatedly to set Chronograph minute hand to the "0" position
3. Press button "A" for 2 seconds.
  - a) Chronograph  $\frac{1}{5}$ -second hand turns a full circle.
4. Press button "B" repeatedly to set Chronograph  $\frac{1}{5}$ -second hand to the "0" position.
5. Push crown back to normal position.

### How to Use

The Chronograph can measure up to 60 minutes in  $\frac{1}{5}$ -second increments

After 60 minutes, it will start counting again for "0" repeatedly up to 12 hours.

- Before using the Chronograph, be sure to check that the crown is set at the normal position and that the Chronograph hands are reset to the "0" position.

### Standard Measurement

Press button "A" to start or stop.

Press button "B" to reset.

\* For the operation of push-button A and B, see "Security lock button operation".

\* The calendar may be either at the three o'clock or nine o'clock position.

### Accumulated Elapsed Time Measurement

Press button "A" to start, stop and restart.

Press button "B" to reset.

### Split Time Measurement

Press button "A" to start.

Press button "B" to measure split time and then again to release split time.

Press button "A" to stop. To reset press button "B".

### Measurement of Two Competitors

Press button "A" to start.

Press button "B" for finish time of first competitor.

Press button "A" for 2nd competitor start.

Press button "B" for finish time of 2nd competitor.

Press button "B" to reset.

### Calendar Adjustment

Pull out the crown to the first click position.

Turn clockwise until the desired date appears.

Push crown back to normal position.

## PERPETUAL CALENDAR Seiko Series SNQ (6A32)

### Features

- Hour, Minute, Second Hand
- Date Calendar
- Once set, the calendar automatically adjusts for odd and even months including February of leap years up to February 28, 2031. After 2032, adjust the year manually following the procedures in "HOW TO CHECK AND ADJUST THE Calendar."
- It indicates the year, month and date.

Before using the watch:

- Because the calendar is pre-adjusted at the factory, you only need to set the time and date

### Time/Date Setting

1. Pull the crown out to second click when the second hand is at the 12 o'clock position.
2. Turn the crown in either direction to set the time and date.
3. Push the crown back completely when set to desired time.

### How to Check and Adjust the Calendar

Follow the procedures below to check the calendar, and if necessary, to adjust it.

- Do not check and adjust the calendar between 11:00 p.m. and 1:00 a.m. If the calendar is checked and adjusted between 11:00 p.m. and 1:00 a.m., the date may not change properly. In such case, first change the time to any time outside this period, and then set the date. After that, move the hands back to the correct time.
- If the crown is pulled out to the second click while the numeral in the calendar frame is advancing or moving back, the second hand may be misaligned from the 12 o'clock position (initial position).

### TIME/DATE SETTING

- The button and crown operation cannot be made while the numeral in the calendar frame is advancing or moving back. Press the button or turn the crown after the numeral stops.
- If the watch is left untouched for more than 2 or 3 minutes while checking or adjusting the calendar, the watch will resume normal movement. In such a case, start again from the beginning of the procedures in "HOW TO CHECK AND ADJUST THE Calendar."
- Do not leave the crown at the first or second click when you use the watch, as this will shorten the battery life.

## PROCEDURES TO CHECK AND ADJUST CALENDAR

### STEP 1 Pull out to first click.

### STEP 3 ZERO-MATCHING THE CALENDAR DISK Press the button. The calendar disk swings back and forth for one time to show that you are now adjusting the zero position of the calendar disk. The calendar disk should show the initially set zero position which is "1." If not, adjust it by turning the crown.

### STEP 2 ZERO-MATCHING THE SECOND POSITION

Press and hold button for 2 seconds, the second hand moves to the initially set zero position which should be exactly at 12 o'clock. If not, adjust it by turning the crown. The calendar disk also moves to the initially set zero position within this step. Date window will display the number 1. If not, adjustment can be made by following instructions in step 3.

### STEP 4 ADJUSTING THE DATE

Press the button. The second hand moves to 9 o'clock position to show that you are now adjusting the date. The calendar disk moves to the initially set current date. Adjust it, if necessary, by turning the crown.

## PERPETUAL CALENDAR

### Seiko Series SNQ (6A32) (cont'd)

#### STEP 5 ADJUSTING THE MONTH

Press the button. The second hand moves to 10 o'clock position to show that you are now adjusting the month. The calendar disk moves to the initially set current month. Adjust it, if necessary, by turning the crown.

#### STEP 7 COMPLETING THE ADJUSTMENT

The calendar adjustment is completed by pushing the crown back to the normal position. Hour, minute and second hands will advance to correct time.

#### STEP 6 ADJUSTING THE YEAR

Press the button. The second hand moves to 11 o'clock position to show that you are now adjusting the year. The calendar disk moves to the initially set current year. Adjust it, if necessary, by turning the crown (the calendar displays the last 2 digits of the Christian Era until 2031).

### Battery Life Indicator

When the second hand starts moving at two-second intervals instead of the normal one-second interval, replace the battery with a new one as soon as possible. Otherwise, the watch will stop operating in a couple of days.

- The time accuracy is not affected even if the second hand is moving at two-second intervals.
- While the second hand is moving at two-second intervals, the date will not change. This is not a malfunction.

### Checking and Adjustment of the Calendar After Battery Change

After the battery is replaced with a new one, be sure to check that the calendar is correct. If the watch does not indicate the year, month and date correctly, adjust the calendar. (See "HOW TO CHECK AND ADJUST THE Calendar.")

Seiko bracelets are designed to be elegant and durable, as well as easy to adjust.

## PRO TIPS

- Before “sizing,” estimate the number of links you’ll want to remove, and remove sections, rather than individual links, when you can.
- If you are only making a small adjustment, check to see if it can be made by adjusting the clasp mechanism before you start removing links.
- Save the removed links.
- Work on a flat surface so the links stay aligned.
- On expansion bracelets, remove links from near the center of the watchband.
- On clasp bracelets, remove an equal number of links from the bracelet on each side of the clasp.

## LOCKING TAB BRACELETS

1. Many bracelets, particularly expansion bracelets in a “top-shell and bottom box” design, are locked together by bent tabs of metal. To size these bracelets:
2. Place the band upside down and use a thin blade to pull out and straighten the tab on one end of a topshell.
- 2A. Lift the band, pivot the end of the topshell with the straightened tab away from the band and “unhook” the other hand to free the topshell. Put this topshell aside for reassembly. Repeat this procedure, on the topshell at the other end of the section you want to remove.

Fig.1

3. Place the band rightside up so you can see the “top boxes” you have exposed by removing topshells. Next, use a thin blade to pull out and straighten the flaps on the bottom boxes diagonally to the left of the topshells you have removed.
- 3A. Then straighten the flaps on the exposed top boxes.

Fig.2

Fig.2A

4. Keeping the bracelet on a flat surface, slide the left hand section of the bracelet away from you as you pull the right hand section toward you.
5. Remove the unwanted section and align the two parts of

Fig.3

Fig.3A

the band for reassembly. “Staple A,” the small hook on the left hand section, should slide into the top box on the right hand section above the spring. “Staple B,” on the right hand section should slide into the bottom box on the available left hand section.

6. Gently “close” the flaps on the top and bottom boxes. Do not use pliers - they can damage a bracelet.

Fig.4

7. Take the first topshell you removed and hook its unbent end into the bracelet over the top box flap. Pivot it into place.
- 7A. Rebend and insert the tab to lock the topshell into position.

Fig.5

## SCREW PIN BRACELETS

These bracelets are easy to size. Unscrew the pins that hold the links you wish to remove, remove those links, reassemble the band, and re-insert a screw to hold it together.

Note that in some bracelets, not all links have accessible screws.

## SPRING CLIP BRACELETS

These bracelets can be quickly sized, once you know how. Looking at the underside of the bracelet, place a pointed object into a spring clip you want to remove and slide the spring clip in the direction of the arrow. Once you have removed the appropriate number of links, align the remaining parts of the bracelet and put one of the spring clips you removed back in to join the bracelet back together.

## SPLIT PIN TYPE (SIZING CODE I)

Push the pin in with the SEIKO Multiple Band Sizing tool or a common band sizing tool in the direction of the arrow and the pin will be removed from the link.

After removing the appropriate number of links, reassemble the links and insert the pin using the sizing tool in the opposite direction of the arrow.

## PIN AND SPLIT PIPE TYPE (SIZING CODE C)

Push the pin in with the sizing tool in the direction of the arrow and the pin and a pipe can be taken out.

Remove the appropriate number of links.

## REASSEMBLY

### Type A

Reassemble the links, place the pipe into the hole of the link and insert the pin in the opposite direction of the arrow.

### Type B

Place the pipe into the hole of the link, reassemble the links and insert the pin in the direction of the arrow.

### Type C

Place the pipe into the hole of the link, reassemble the links and insert the pin.

Seiko has introduced a bracelet sizing coding system, adding a sizing code on each bracelet after the Band # with a dot in-between as shown below. The bracelet code can be found on the back of the bracelet either on the end piece, clasp, or on the links.

114BA · A

Band No.      Bracelet sizing code

See Operational Guide for detailed instructions on bracelet sizing codes.
